PUBLICIS REVENUES AND BILLINGS RISE IN FIRST NINE MONTHS OF YEAR

Paris, November 13, 2002 – Publicis Groupe SA revenues and billings both rose during the first nine months of 2002, and the inflow of new business was very strong.

Publicis Groupe SA revenues over the first nine months of this year grew to 1.77 billion euros from 1.74 billion euros during the same nine month period to September 30 of last year, representing growth of 1.6 per cent.

This increase is due primarily to the consolidation of Zenithmedia, which had been consolidated only during the fourth quarter of last year, and from several days of activity of Bcom3, whose acquisition closed on September 24 of this year.

At the same time, the impact of exchange rates was unfavorable following the very strong appreciation of the euro in relation to the dollar from the middle of the second quarter of this year. This practically erased the additional revenues generated by the newly-consolidated activities. On a fully comparable basis (identical exchange rates and business units), organic growth slowed by 3.7 per cent.

Maurice Lévy, Président of the *Directoire* of Publicis Groupe SA commented:

«The most notable feature of the current marketplace remains poor visibility and, therefore uncertainty about advertiser investment decisions, including in the short term. The expected improvement in the marketplace in the third quarter did not materialize ; on the contrary, the drop which began in 2001, continued and, even accelerated in some countries. In this morose environment, at the same time, Publicis is clearly performing better than most of its competitors, thanks to its client portfolio, including a high proportion of clients who are in resilient sectors. Groupe new business has returned to a very strong pace, which is almost making up for the downturn in the market and budget cuts among our clients.

PUBLICIS GROUPE S.A.

Our efforts continue to be focused on new business from both current and new clients, improving our cost structures and the smooth integration of Bcom3 ».

Main features of third-quarter business and environment:

The global advertising market did not differ too much according to geographic region. Europe in general and North America experienced comparable decreases while Asia showed growth.
